ETERNAL DESIGN, SUSTAINABLE SOUL

Water is the ultimate architect, carving timeless beauty with quiet persistence. Our surfaces embody this essence, merging an eternal design with a sustainable soul. By replicating the fluid artistry of water-sculpted marble, we bring the breathtaking harmony of the natural world into any space.

The eternal journey of water flowing through stone finds its perfect reflection in our surfaces. For millennia, the constant movement of water has sculpted rock, carving fluid veins and patterns that hold the memory of the living natural world. This same fluidity, dynamism, and stunning visual impact are brought directly to our product: surfaces that mimic marble with extraordinary three-dimensional realism, capturing the organic power of the landscape for any architectural setting.

Designed to seamlessly integrate into all types of spaces—from avant-garde hotels and offices to commercial and residential projects—this material offers a wide variety of options. The palette spans a versatile range of light backdrops and intermediate tones, evoking everything from the clarity of a crystal-clear mountain stream to the warmth of minerals washed by the current. Each piece becomes a durable work of art, completely non-porous and backed by unmatched technical resistance.

Most importantly, this connection to nature is built on a deep ethical commitment. Our product is a much better alternative for the environment, manufactured through eco-responsible processes that optimize water use and drastically reduce the carbon footprint. It is, in essence, the beauty of water-sculpted stone, sustainably adapted for the design of the future.

SILICA FREE, A MORE PROMISING FUTURE STARTS HERE

BETTER HEALTH, BETTER WORLD

REVIVE commitment to a better future materializes in a formula that is more respectful with the environment and the communities. It results in less waste ending up in landfills and a lower carbon footprint in the production of the finished product.

In addition to this, REVIVE eliminates the crystalline silica content in all the slabs, creating thePeople's health and safety are our top priorities. Phi surfaces are entirely safe for customers, and their handling by workers is completely secure as long as appropriate measures are taken.

ENGINEERED MARBLE

VISUAL IMPACT AND COLOR VARIETY

The natural choice to exceed expectations in any environment where marble surfacing can be used and offers a variety of solutions that were once considered unthinkable. REVIVE combines natural marble with innovative engineering to achieve the ideal size, colors, and quality. Whether you are an architect or designer wanting to take advantage of its beauty and durability, or a homeowner aspiring for that perfect look, REVIVE will work for you.

RECYCLED NATURAL MATERIALS
Made with approximately 95% natural marble, including material recovered from traditional marble processing.

NATURAL MARBLE BEAUTY
Authentic marble aggregate creates depth, character and a refined stone appearance.

CONSISTENT DESIGN
Engineered manufacturing provides greater consistency in color and pattern.

POLISHED FINISH
A smooth polished surface enhances the beauty and character of the marble.

EASY MAINTENANCE
Designed for simple everyday care using mild soap and water.

VERSATILE APPLICATIONS
Ideal for vanity tops, shower walls, backsplashes and interior wall applications.

CARRARA ARNO

We are proud to add this stone to our Carrara inspired marble options. Its name is derived from the famous Tuscan river Arno and features grey veining and glass inclusions that swirl and move like ripples on the river's surface. The river Arno winds through the Tuscan capital of Florence and we hope this beautiful stone will be your daily reminder of this stunning part of the world.

SYRACUSE

Syracuse features a color palette reminiscent of this famous coastal Sicilian city. Sandy soft brown beaches, jagged limestone cliffs and ancient amphitheatres were our inspiration for this pattern. It has a base of two tone beige with miniscule flecks of silver however the most prominent feature is the swirling glass inclusions that provide the greatest visual impact.
